

carsi

Center for Advanced Research
of Spatial Information

The Center for Advanced Research
of Spatial Information is looking for an

Undergraduate Research Assistant

for software development in the enviroCar project (see envirocar.org). enviroCar is an open platform for citizen science projects in the field of sustainable mobility. Citizens, scientists, traffic planners and industry collect and analyze floating car data and share their findings.

We are looking for a student with experience in any of the following fields:

- Experience in developing apps for the Android platform
- Programming experience in Java

There is also an opportunity to work on aspects of this project under a Google Summer of Code grant.

Interested students should contact:

Carsten Kessler

carsten.kessler@hunter.cuny.edu
